Sven Grooten

スヴェン・ヒュロートン

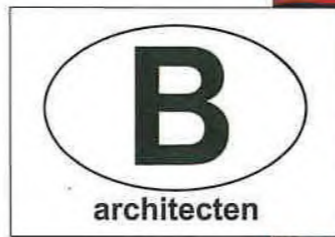

「昔は建築家も医者も単独で活動していたけれど、今はグループによるパワフルな仕事求められる。まずアイデアを出しあって構想をまとめ、それぞれの仕事を分担する。喧嘩? 日常茶飯事だよ」とディルク。69年生まれのディルクとエヴァート、71年生まれのスヴェンの3人組みビー・アーキテクトンは、国がらみのビッグプロジェクトからウオルターやステファン・シュナイダーのブティックまで、さまざまな仕事をこなす話題の建築家集団だ。ともにアントワープ王立芸術学院を経て、アムステルダムベルラーグ・インスティテュートで建築

からインテリアデザインまでを学び、97年からチームを組んでいる。ビーはベルギーのB。古い建物を新しい空間に生まれ変わらせる仕事が多い彼らは、その建物自体が持つキャラクターを生かした、新しさと荒っぽさの共存がデザインのモットー。そしてそこにベルギーらしさがあるという。現在手がけるビッグプロジェクトはブリュッセルのフレイッシュシュ劇場。コンペティションに勝ち、2002年の完成に向け作業を進めている。屋外のようなラフなイメージを残した劇場

になる予定だ。一方、アントワープ市内ではエニープレイスアーバノフットも進行中。1880年建築のダイヤモンド加工工場を住居やオフィスが入るビルに改装するもので、2000年6月の完成後は自分たちの活躍の場もそこへ移す。

SUSTAINABILITY

B mission/vision

B-architecten & B-bis is a platform looking for surprising spatial solutions that target both the quality of life and sustainability.

We at B & B-bis believe that every single person can make a difference in life.

Our business is the developing and the designing of spatial solutions. But we do it with a passion aiming at a better society with the town as the main target.

That is why B & B-bis is so much more than a mere building development agency.

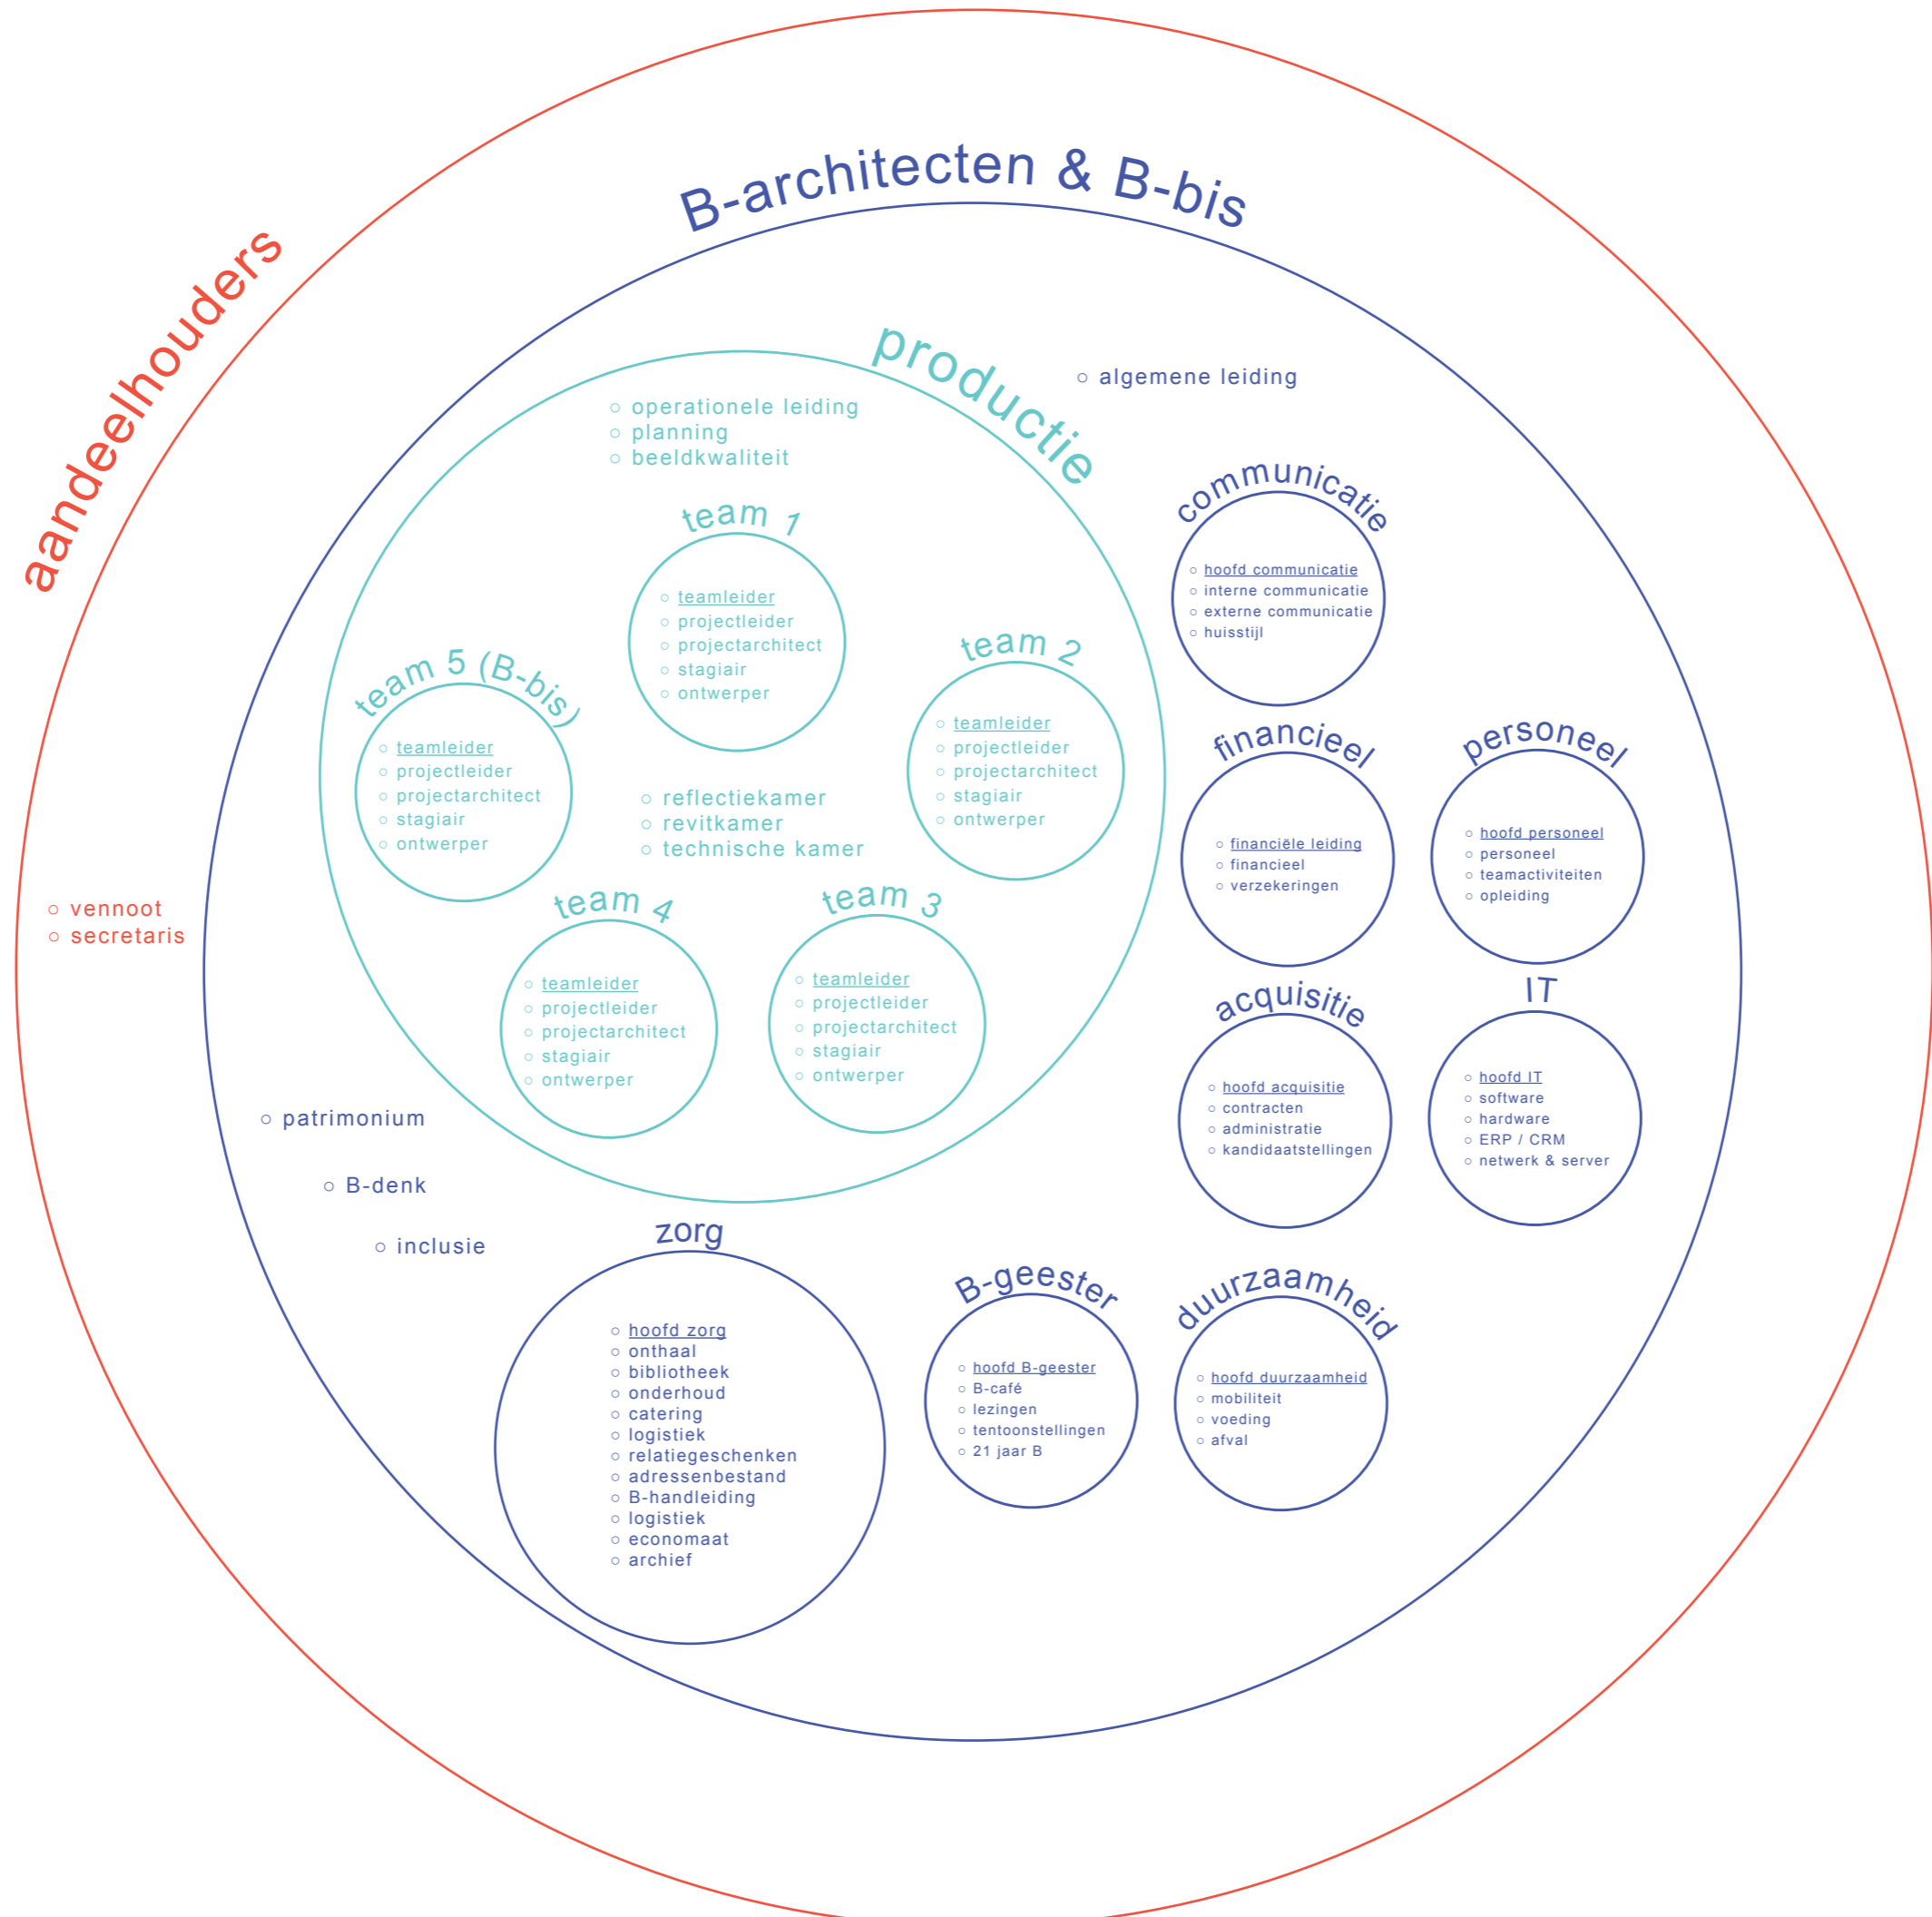

We offer a platform for talented designers who want to improve the quality of life and of living and who want to have an impact on the urban planning policies. Our core business is design, ranging from a door handle to a city district. But we also invest in innovative research, we debate, we publish, we initiate our own ideas and we never stop pushing the boundaries of our profession.

For us a better living environment can be achieved by urban densification. It will allow an optimized mix of emotional experience, concentration, sustainability, equality, quality, human scaled design and technology. To achieve this we trust the power of the platform and the clever alliances with complementary partners.

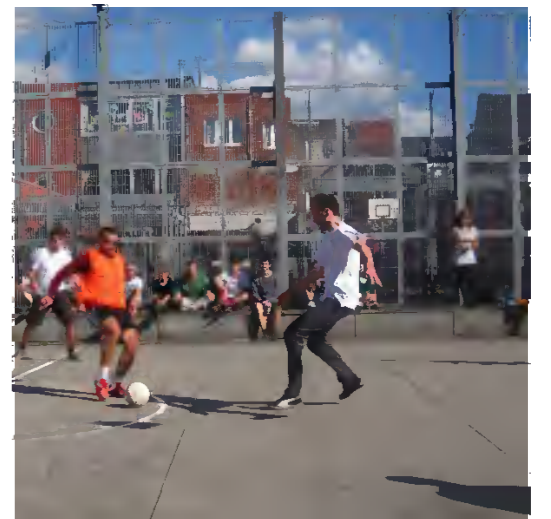

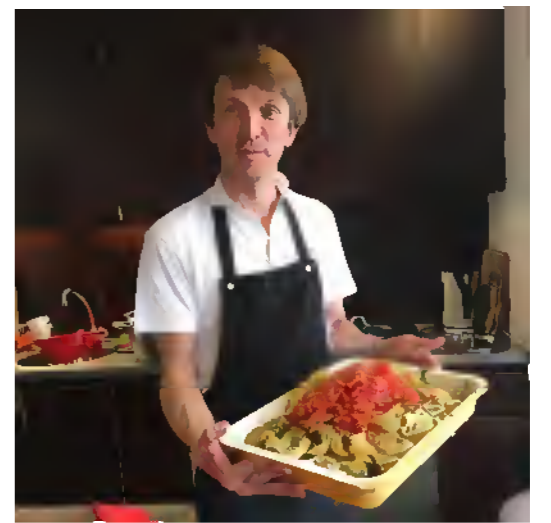

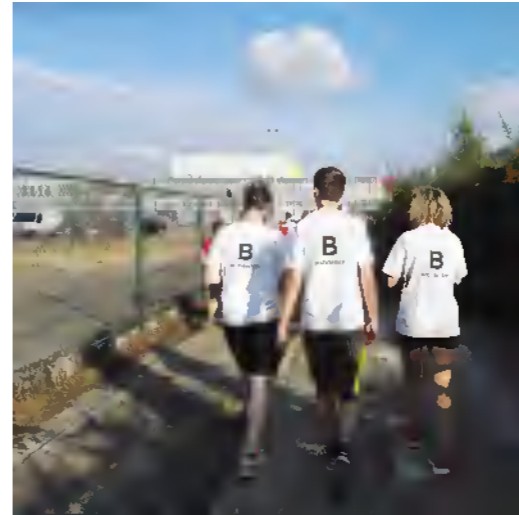

For B & B-bis every project is an opportunity. We ask questions, we investigate and we try out.

We dare to question the question, we add value to it and then allow the design to develop organically into a logical but often surprising solution. It makes all of our designs unique. The knowledge and the expertise that we have acquired serve as a source of inspiration for our new colleagues and other talented co-workers.

We are dreaming pragmatics eager for tradition yet always respecting the future.

B Missie/Visie

B-architecten is een platform dat zoekt naar verrassende ruimtelijke oplossingen met levenskwaliteit en duurzaamheid als doel.

Bij B geloven we dat iedereen een positief verschil kan maken. Wij gooien onze passie als ontwerper en bedenker van ruimtelijke oplossingen in de strijd om te bouwen aan een betere samenleving met de stad als focus. Dit maakt dat B meer is dan een groep ontwerpers van enkel gebouwen.

We zijn een platform van talentvolle ontwerpers die willen wegen op het beleid en impact willen hebben op de kwaliteit van wonen en leven. Ontwerpen is onze kerntaak – van deurklink tot stadswijk – maar we investeren evenzeer in innoverend onderzoek, we publiceren en discussiëren, zetten in op eigen initiatieven en grijpen kansen om de grenzen van ons vak te verleggen.

Een verbeterde leefomgeving betekent voor ons een verdichte stedelijkheid, ontworpen met het oog op een optimale mix van beleving, concentratie, duurzaamheid, gelijkwaardigheid, kwaliteit, menselijke maat en technologie. Om dit doel te realiseren vertrouwen we in de kracht van het platform en vormen we slimme allianties met complementaire partners.

B grijpt elk project aan als een kans om te bevragen, te onderzoeken en uit te proberen.

We durven de vraag in vraag te stellen, we voegen waarde toe en laten de vormgeving op een logische, maar vaak verrassende manier uit de oplossing vloeien. Onze ontwerpen zijn daardoor telkens uniek. De kennis en ervaring die we in de loop van de jaren hebben opgebouwd zetten we in als bron van inspiratie voor nieuwe medewerkers en andere talenten. We zijn dromende pragmatici die nieuwsgierig zijn naar traditie en respect hebben voor de toekomst.
